

# Blood Collection Quick Guide

## Canterbury

### BIOCHEMISTRY

- C-Reactive Protein
- Ca/PO<sub>4</sub>
- Creatinine
- Electrolytes
- FSH/LH/Prolactin/Progesterone/Oestradiol<sup>1</sup>
- Glucose<sup>4</sup>
- GTT (75 g)
- HbA1c
- HCG<sup>1</sup>
- Immunoglobulins
- Lipase
- Lipids<sup>4</sup>
- Liver Function
- CK
- Polycose Challenge (50 g: 1 hour)
- Protein Electrophoresis
- PSA
- Thyroid Function Tests<sup>2</sup> (FT<sub>4</sub>/TSH/FT<sub>3</sub>)
- Therapeutic Drugs<sup>3</sup> (except Cyclosporin and Tacrolimus)
- Troponin
- Urea
- Uric Acid

### IMMUNOLOGY

- ● ● ● 1st Antenatal Screen
- ● Subsequent Antenatal Screen
- Antinuclear Antibodies/Autoantibodies
- Blood Group and Rh
- Coeliac Antibodies
- CCP Antibodies
- Cytomegalovirus Antibodies (CMV)
- EBV Serology
- Hepatitis A
- Hepatitis B
- Hepatitis C
- HIV Antibodies
- Rheumatoid Factor
- Rubella
- Syphilis
- Thyroid Antibodies
- Toxoplasma Antibodies

### HAEMATOLOGY

- CBC
- Coagulation Screen
- Ferritin/Iron Studies
- INR
- Serum B12/Folate

### KEY

- Sodium Citrate (Blue)
- SST (Yellow)
- Plain (Red)
- Pink
- EDTA (Lavender)
- Oxalate/Fluoride (Grey)

#### Additional Notes:

- 1 Please note Date of LMP for – HCG, FSH, LH, Prolactin, Progesterone and Oestradiol.
- 2 Please note if on Thyroxine or other Thyroid medication.
- 3 Please specify Drug Dosage and hours post dose. Some drugs require special collections or different specimen tube type– please check Specimen Collection Guide if unsure.
- 4 Please note fasting (F) or non-fasting (N/F).
