

Replacement of the 70 ml specimen containers

Our current supplier for the 70 ml orange lid specimen container can no longer supply this stock. We have managed to identify another supplier that can manufacture similar specimen container with a pink lid. The orange and pink lid containers are essentially the same. Labtests will continue to supply the orange lid containers until stock has been consumed.

When placing your next order of specimen containers you will notice the product description has changed to 'Container 70ml Pot Pink Lid'.
