

Patient : DEMO, WELL MOL PATH
Address : C/O WELLINGTON HOSPITAL LAB
Under C/: DIFFERENT NAME

NHI:
Sex: Male
Age: 50 Years Received: 30/11/2020
DOB: 01/01/1970 Reported: 30/11/2020
Lab: 20-4191332

SARS-CoV-2 (Novel Coronavirus) NAAT

Specimen site: Nasopharyngeal Swab

SARS coronavirus 2 RNA: Not Detected

Comment: A negative nasopharyngeal or oropharyngeal swab doesn't completely exclude SARS-CoV-2 infection, particularly early or late in the course of illness. A repeat sample may be taken if the patient's symptoms deteriorate in the absence of another credible cause.

This test was performed by Wellington SCL using Real-Time Reverse Transcription PCR.
