

Patient : DEMO, WELL MOL PATH
Address : C/O WELLINGTON HOSPITAL LAB
Under C/: WELLINGTON SCL MICROBIOLOGY
Copy to KOEN.

NHI:
Sex: Male
Age: 51 Years Received: 15/01/2021
DOB: 01/01/1970 Reported: 15/01/2021
Lab: 21-4701738

SARS-CoV-2 (Novel Coronavirus) NAAT

Specimen site: Nasopharyngeal Swab

SARS coronavirus 2 RNA: Not Detected

Comment: A negative nasopharyngeal or oropharyngeal swab doesn't completely exclude SARS-CoV-2 infection, particularly early or late in the course of illness. A repeat sample may be taken if the patient's symptoms deteriorate in the absence of another credible cause.

This test was performed by Test performed using Real-Time Reverse Transcription PCR on the Xpert Xpress SARS-CoV-2 assay on the Cepheid GeneXpert instrument at Wellington SCL, Wellington Hospital.
